The actual tuition a student pays will vary due to credit load, residency status and other factors.

University partnerships allow Kitsap and Mason county residents to earn bachelor degrees locally

It was not long ago that students looking to earn bachelor's degree locally did not have many options here in Kitsap County. That began to change in 2008, when Olympic College launched its highly successful Nursing program. That degree was followed in 2014 by the Bachelor of Applied Science (B.A.S.) in Computer Information Systems. Today, the College offers three baccalaureate degrees with the recent addition of the Organizational Leadership and Technical Management program, which enrolled its first group of students this fall.

The number of four-year degree offerings available at OC continues to increase thanks to partnerships with state universities that offer their programs at our campuses. The first partnership degree available at Olympic College was the Bachelor of Science (B.S.) in Mechanical Engineering through Washington State University (WSU). This program launched in 2010 at the Bremerton Campus and has since graduated 77 students. Enrollment in OC’s engineering associate degree program has doubled since WSU began offering a Bachelor of Science in Mechanical Engineering degree in Kitsap County.

“Our partnership with WSU is an innovation that has opened doors to advanced baccalaureate degree opportunities locally,” said OC President Dr. David Mitchell. “It has been cited as the first of its kind in Washington state, paving the way for similar partnerships with other colleges like Western Washington University (WWU).”

Through its partnership with WWU on the Peninsulas, nationally recognized programs like their Bachelor of Arts (B.A.) in Business Administration, Environmental Policy B.A., and Environmental Science B.S. are all available at the OC’s Poulsbo campus.

These programs allow students to earn an associate degree with Olympic College then transfer into a partnership program, all without having to leave Kitsap County. Students gain access to highly-sought after degrees without the added cost and competitive admissions away from Kitsap County. For students like Tatiane Simons, these local options may be the only option.

After earning her associate degree in Business and Economics from OC, Tatiane's goal was to transfer into a bachelor degree program at a state university. With two small children at home and two part-time jobs, the possibility of relocating or commuting everyday was not realistic. She waited nearly four years for a partnership like the one with WWU to materialize.

In June, Tatiane, a U.S. Navy veteran, will graduate from WWU on the Peninsulas with a B.A. in Business Administration.

“I have gone from working two part-time jobs to a full-time management position. From my vantage point, I know the impact of having a university of this caliber here in partnership with Olympic College Poulsbo will equate to success not only for the institutions but also for students in a similar situation that I was in,” she said.

Through its partnership with Western Washington University (WWU) on the Peninsulas Environmental Science student John Adamson couldn’t agree more.

“The partnership between WWU and OC gives local students an opportunity to earn a four-year degree that is close to home, family and careers,” he said.

The success of these partnerships contributed to the state Legislature’s decision to fund the expansion of these programs. Beginning in 2016, WSU will offer a Bachelor of Science in Electrical Engineering at OC Bremerton, and WWU will provide a Bachelor of Applied Science in Cyber Security at OC Poulsbo.

College partnerships are not limited to local universities. OC has long-standing relationships with Old Dominion University (ODU) Online. Through a Guaranteed Admission Agreement, OC students can complete an associate degree then transfer to ODU and take upper division courses through distance learning to work towards a bachelor’s degree.

OC also partners with Brandman University, which is considered one of the top education options for military personnel transitioning to civilian life. The Early Advantage Program ensures students will have a seamless transition to complete their four-year degrees.

Online or in-person, Kitsap and Mason county residents have more options than ever to earn bachelor’s degrees. The pathway to higher education that once took students away from this region has been re-directed. Thanks to our Partners in Higher Education, place-bound students who would not otherwise have access to baccalaureate degrees, have the opportunity to earn their four-year degrees right here in Kitsap County.

Partners Programs and Pathways

Olympic College students can earn a bachelor’s or master’s degrees through one of our university Partners. Students gain access to nationally recognized Programs available right here in your hometown. Our university partnerships provide clear Pathways where students earn their associate degree with OC, then transfer into a partner program. To learn more, visit olympic.edu and search ‘partners’.
Dr. James Estrella leads diversity discussion panels at Olympic College

Growing up in Los Angeles in the 1980s, James Estrella and his family were constantly moving from one rental to the next. Reflecting on this past, James now understands what he didn’t then as a child—that it is common for women of color to face discrimination on multiple fronts.

“My mom, as a single mother, never felt safe,” James recalls. “It didn’t matter what kind of neighborhood we were in. Because of racial discrimination and sexual harassment, we moved every two to three years, and consequently, my brothers and I were never in the same school for very long.”

This constant moving had an impact on James’ education and sense of self. He struggled to learn how to read and was bullied by classmates who viewed him as dumb, effeminate and overweight. As a coping mechanism, James turned to stories and storytelling to think about how other people lived.

**Education as a tool**

Immersed in learning, James took notice of how he was different from others and began asking questions about the social consequences of these differences. Why did his family constantly have to move? Why was it so important to behave ‘like a boy’? How does this background shape his worldview?

“Not conforming to a traditional family model is certainly no easy feat. It limited my family’s options in terms of where we could live and how people viewed us,” he said.

“But I also know that being raised by a single mom gave me lots of gifts, like continuously learning how to reflect on my male privilege as a queer Chicano, as a gay man of Mexican descent.”

An inspirational seventh-grade teacher, Ms. Norma, fostered an open and safe classroom environment that rewarded James for asking difficult questions. He credits her for inspiring his academic turnaround and instilling in him an inquisitive nature that would serve as motivation to excel in school and earn a doctorate in ethnic and gender studies from Stanford University.

**Diversity studies at Olympic College**

In 2014, Dr. James Estrella was hired by Olympic College to launch a new diversity studies discipline, American Culture and Equity studies (ACES). Students now have the opportunity to enroll in courses such as Introduction to American Culture and Black Voices in America, Equity Studies, Latinos in the U.S., and The LGBTQ Experience.

Students can preview some of the content covered in his courses and interact with James in his monthly diversity discussion panels, hosted in coordination with the College’s Multicultural and Student Programs office. These discussions cover topics about how to better understand race, class, gender and sexuality in their social and historical contexts.

Through these discussions, James hopes students will start to ask some of the questions he did as a student by providing an environment that empowers them to start dialogues on topics that are often difficult to discuss.

“One of my goals is to give people the tools to discuss important and challenging topics that make us feel uncomfortable,” James said. “Whether we like it or not, these things exist in the world and until we can actually talk about it, that is when we can start doing something about it.”

**Finding strength in differences**

James self-identifies as a Chicano, which recognizes his family’s indigenous roots in Mexico. During the 1960s, the term Chicano grew in use as Mexican Americans challenged colonialism and systemic oppression through creative expressions of their cultural identities.

Like those pioneers of the 1960s, James hopes that by creating a direct platform for discussion, people will feel empowered to run towards differences instead of away from them.

“Really, it’s about engaging other people’s stories that defy how we understand and perceive the world,” he said. “When there is a perceived crisis or breakdown due to difference, an opportunity is provided for us to rebuild a more just world. I don’t see diversity as being simply about disagreements, but how innovation and creativity can emerge from our differences.”
