DIGITAL FILMMAKING

Explore your opportunities in an exciting career pathway!

Introducing The OC Film School!

A revolutionary new program designed for today's digital artists. The rise of the digital era has led to a shift in the industry where tools of the modern filmmaker are more accessible than ever before. We believe a world-class film school experience should be equally accessible. As a student of the OC Film School, you will learn all of the skills needed to compete in this new frontier of digital film, at a fraction of the cost of other schools. Acclaimed instructors with successful film careers provide hands-on practical training designed to equip you with the theoretical and technical skills of the modern filmmaking industry.

OC Digital Film students have the opportunity to:

- Assemble a demo reel from Olympic College film projects
- Gain practical hands-on training by working on digital filmmaking projects
- Construct an industry resumé detailing specific filmmaking crafts positions
- Study film language and the techniques of cinematography
- Practice the art and craft of film acting
- Acquire film directing skill and expertise in directing actors
- Artfully tell original stories and complete a feature length screenplay
- Obtain film editing and visual effects skills by mastering industry software

Digital Filmmaking Bachelor in Applied Science (180 cr)

The Bachelor of Applied Science in Digital Filmmaking (BAS DF) is a practitioner-oriented applied degree that will prepare students for a range of positions in the rapidly changing field of digital film, including jobs in video production, directing, cinematography, screenwriting and acting. The degree will also prepare them for digital content production in a variety of industries, including jobs with branding, marketing and advertising companies, businesses in any industry that creates digital content for training purposes and entrepreneurial opportunities.

Digital Filmmaking Associate in Applied Science—Transfer (97 cr)

Olympic College's Digital Filmmaking Program offers students a unique blend of film theory and practical hands-on training. Our students learn the craft and techniques of narrative storytelling while acquiring the technical skills and artistic sensibilities necessary to compete in the new emerging frontier of digital filmmaking.

Our curriculum integrates concentrated classroom study of all the major filmmaking disciplines with intensive hands-on experience in student film projects because our philosophy stipulates that the fruits of theory realize full maturity in the practical application of the art.

While the focus of our program is the narrative fiction film, the artistic and technical skills acquired by our students are transferable to television, commercials, documentaries, music videos and the blossoming new arena of episodic web content. This program is dedicated to serving the authentic needs of the modern dramatic artists of the 21st century.

Our educational philosophy clearly declares that the contemporary dramatic artist is a digital artist. This is of vital importance because knowledge and training in digital movie making means higher employment for our students upon graduation.

“The Olympic College Film School is such an exciting program to be a part of. As a student in this program, you get to bring YOUR voice and YOUR vision to life. I have no doubt that I'll have what it takes to make it in the ‘real world’ once I'm finished studying. ”

- Curtis Keat, Digital Filmmaking Student

“Being around like-minded individuals has proven to be nurturing to my creative process.”

- Jared Rank, Digital Filmmaking Student
