Community College Average Cost to Attend

The average cost to educate a resident full-time community or technical college student for the 2015-16 academic year is $7,126. Students pay an average of $3,056 in tuition toward this cost. The remaining $4,070 is an "opportunity pathway" provided by the State and is funded by state taxes and other sources. The amounts shown are averages for a full-time, resident student. The actual tuition a student pays will vary due to credit load, residency status and other factors.
In 2015, at the age of 35, Ruby Behlen enrolled at Olympic College with the intention of completing her GED. That goal changed slightly after learning of a new program designed to help adults earn their high school diplomas.

This past spring, Ruby was among the first students at OC to earn a degree through High School 21+. At the graduation ceremony, she jumped at the opportunity to say a few words about her experiences in the program.

“It takes a lot of courage for all of the adults, all of the parents, all of the people who left high school for any reason to actually come back,” she said.

As she worked her way through the program, Ruby felt an array of emotions from excitement to uncertainty and even embarrassment.

“It's hard going through all of those emotions at once because here I am 35, just completing my high school diploma,” she said. “I'm pretty well-spoken, so most people didn't even know that I didn't have my high school diploma.”

OC Professor Dr. Karen Bolton, who spoke at the graduation ceremony, knows first-hand what students like Ruby are going through. Bolton's parents and siblings all attended college, but she was different; dropping out of high school and eventually earning her GED before completing a 21-year decorated career in the Navy.

“People doubted me. They still doubt me,” she said in her speech to students. “You have to work twice as hard when you have a GED to prove to others that you belong. But you don't really have to. You've made it, the rest is easy. That hurdle is removed.”

City of Bremerton Mayor Patty Lent, who also spoke at the ceremony, shares Bolton's sentiments.

“It is never too late to pursue their career path. Without a high school diploma or GED they will have hurdles that are difficult to overcome,” she said. “For many of these students who have come back to school after all of these years, it is a very brave thing for them to do and I hope they never feel the need apologize for their accomplishments.”

When Ruby decided to continue her education, she didn’t realize the barriers that existed as a result of not completing high school, even though she was only three credits short. One such hurdle was applying for federal financial aid which requires a high school diploma or GED.

There were many other adjustments along the way, but Ruby's transition back to school was helped by the staff and faculty she encountered at the College.

Her first contact was with Anthony Carson, from the Advising/Counseling office, who Ruby says went above and beyond to make her feel welcomed and informed. After their appointment, he walked with her down the hall to the Basic Studies office to schedule her next appointment.

“If he wouldn't have done that, I don't know if I would have followed through with it,” she said.

From there, the personalized instruction continued.

Ruby credits instructors Tina Prentice, Cindy Frederick and Basic Studies staff member Heather McKnight for helping her rediscover skills she had not used in years.

“Tina and Cindy have literally been the foundation of my adult education,” Ruby says. “They helped me understand, define and polish skills I have learned through life experience.”

High School 21+ is a competency based program which means students get credit for their life and work experience which they can apply to the completion of their high school diploma in lieu of additional classes.

The capstone of the program is a portfolio class where students must write papers that demonstrate their knowledge in areas that were not completed while in high school. The portfolio class provides valuable experience that sets the stage and expectation for the continuation of their education.

With her high school diploma now complete, Ruby plans to continue her education at OC in one of the College's health occupations programs.

“From the moment I walked through the doors at OC, the entire staff was very, very helpful,” she said. “I really credit everyone in the Basic Studies office for helping me get back into the academic swing of things.”
