OC’s new building is redefining higher education in Kitsap County

Olympic College’s newest building, the College Instruction Center, is changing both the physical and educational landscapes at the Bremerton Campus.

The 70,000 square-foot, three-story facility reshapes the skyline as drivers approach downtown Bremerton from the Warren Avenue Bridge. The real game-changing elements of the College Instruction Center exist within its walls. Expansive windows allow light to flood the entryway even on the grayest of Pacific Northwest days. The centerpiece of the building is the 276-seat William D. Harvey Theater, which awaits visitors as they enter. The façade of the theater features hand painted walls that reach skyward in a grand space traversing all three stories. Within the theater is a state-of-the-art space with all the features one could hope for in a modern theater including adjustable acoustics and stage settings for music, drama, lectures and film that can be used by all of the programs on campus.

A community gathering place

Beyond its many benefits to OC students is the theater’s potential to draw community members to campus for cultural and educational events. The College plans to make the space available to the community in the near future. Until then, OC will host its own events for campus and community events such as the OC Alumni Association’s popular Speaker Series, which begins Feb. 1 with a talk from OC biology faculty and 2017 YWCA Woman of Achievement Amy Lawrence. Last year, the speaker series attracted near capacity audiences to all four talks.

A new home for the arts

The College Instruction Center is also home to OC’s art department, offering curriculum in ceramics, digital design, drawing and painting and more. Visitors to the ceramics classrooms dubbed it the “football field” for its impressive size. Ceiling-to-floor windows allow those walking by to observe students working the pottery wheels. The new space opens the door to collaborative educational opportunities between art and professional-technical programs.

“We hope to partner with programs like engineering, manufacturing and nursing because we believe creative practices lead to higher success outcomes for all students,” said art professor Marie Weichman. “Faculty from WSU’s engineering program have already approached us with the same hopes. Our new building has everyone excited about the future.”

The second floor of the CIC building includes drawing, design and painting studios, each dedicated to its own discipline. In addition to traditional easels, classrooms are being outfitted with iPad Pro computers where students can draw on the screen using a stylus. Classrooms are also equipped with configurable lighting systems and new teaching stations allowing professors to infuse technology into their lectures.

The new gallery will feature the work of student, local, national and international artists. The inaugural show on Jan. 26 was a collaboration between OC, Bainbridge Artisan Resource Network and the Bainbridge Island Museum of Art.

Music to my ears

In the foyer of the instruction center is a grand piano. During the first week of the quarter, music student Daniel Carlin sat down for an impromptu performance for all to enjoy. Music program students quickly located the spacious rehearsal studios on the first and second floors. The new rehearsal spaces make the previous ones look like telephones booths, which, like the old music building, is now a relic of the past.

On the first day of the quarter, choral students gathered on the theater stage for a quick orientation from professor Evin Lambert. Before long they began rehearsal, making it easy to imagine what the atmosphere will be like when the curtains open for the first public performance.

High-tech health

The nursing assistant skills lab transports students into what looks and feels like a real clinical environment with hospital beds and a ceiling-mounted lift for transferring and positioning clients. The lab even has a teaching shower room, where students can simulate essential skills they will use in the workforce.

The Physical Therapist Assistant (PTA) program, which had been located at the Poulsbo Campus, has a new home in the instruction center as well. The spacious configuration provides plenty of room for students to practice the rehabilitation exercises and movements they will perform on patients when they land jobs after completing the two-year program.

“The PTA facility is truly exceptional,” said PTA faculty and program manager Lynn Bartlett. “The lab is significantly larger than our previous space providing opportunities for learning and practicing techniques used in the field.”

Still moving in

When the building opened on Jan. 2, faculty and staff were still getting used to the new facility. One month into the quarter and everyone is starting to feel more at home. Boxes are mostly unpacked, faculty are learning how to use their new high-tech classrooms, and students are enjoying the many benefits of a new building. Even with the challenges of moving into a new location, it was apparent from day one that the CIC is a transformative space that raises the bar on education while drawing the community closer to the college than ever before.

“I have no doubt it will facilitate nursing student learning, and the development of clinical reasoning and judgment, preparing graduates to provide excellent care to their clients.”

“I am so thankful to all of the donors, especially Hospice of Kitsap County, for their generosity that allowed for the purchase of equipment,” said Dean of Nursing Dr. Geri Babbo. “I have no doubt it will facilitate nursing student learning, and the development of clinical reasoning and judgment, preparing graduates to provide excellent care to their clients.”

A digital film revolution

OC’s ground breaking digital film program, the OC Film School, also resides in the new building. The sound stage is a remarkable sight with moveable walls used to create sets where future directors will hone their craft. The editing studio features 12 iMac workstations equipped with industry standard editing software.

Most film schools require students to specialize in one phase of filmmaking, but students in the OC Film School can check out brand new gear early on in their education as they learn all aspects of the filmmaking process.

“We have the most cost effective film school on the west coast. Graduates of our program learn how to use modern distribution channels like YouTube, Netflix and Hulu to reach new audiences,” says film school professor Tim Hagan.
